I am writing to thank your company for the excellent job done on our paver and pool remodel project. Although bricks were delayed due to the concrete shortage, once the bricks arrived the work was executed promptly and professionally. I additionally want to thank you for your flexibility with us regarding the final payment. Last week when the work was completed we were leaving on a trip to Russia for a foreign adoption of two children making it very difficult for us to stop by and settle the final payment. The extra week allowed us to make it home from a seriously exhausting but fulfilling trip.

On a personal note Brenda and I would like to recognize Stan Waitkus as our sales representative for his professionalism and "make it happen" attitude. When Stan said it was going to happen on a particular day it did. Stan also kept us informed of the progress on the bricks while they were delayed several weeks. We would not hesitate to recommend Stan and National Brick Pavers to any one interested in a quality experience.

Sincerely,

Craig Szklany
