Dave Gordon
National Brick Pavers

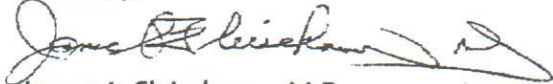

Dear Dave,

I am writing to commend you for the outstanding job which you and your company did in completing the renovation of the pool and patio at our home. Prior to hiring you, I did not have any personal recommendation regarding a pool and pavers company, so I went to the Yellow Pages and interviewed three companies. What impressed me about your approach, was the no nonsense, logical plan for the renovation which you proposed, along with imparting a real sense of sincerity about the quality and value you were offering for a fair price, as well as a genuine concern about producing a superior result which would meet and exceed our expectations. In particular, all of the other contractors were obviously trying to make a profit on the "Diamond Brite" portion of the project, whereas you clearly were just charging it at your cost. You also include several "extras" at no additional charge.

The craftsmen who performed the work were truly "old world". The tile work and coping replacement, and the patio marble installation were all done in a pains staking manner resulting in a superior result. The "Diamond Brite" replacement was also essentially perfect, and my pool man commented on how nicely it had been applied. As important to me, after the main phases of the project had been finished, there were a couple of minor issues remaining, and you made sure that everything was completed to my satisfaction before we considered the job fully completed.

As a result of the fairness of the contract, the exceptional execution of all phases of the work performed, and the availability and helpfulness you exhibited from start to finish, I recommend your company enthusiastically and without hesitation to anyone interested in beautifying their home in this fashion. I now truly enjoy looking out at our pool every day, more than I could have imagined.

Sincerely,

James A. Fleischman, M.D.
